

SILVER STAR

World's Finest Products For Harley-Davidsons

S&S Rocker Cover Kits

These two-piece rocker covers are designed with discriminating custom and performance enthusiasts in mind.

For Evolution Big Twin 84-99 and Sportster Models from 86-03

Made to accommodate .710" lift when used with S&S Super Stock Street or OEM heads, and .810" lift with S&S special application heads when using S&S rocker arms. Permits in-frame installation, but taller motors such as S&S 103" long blocks may require removal of engine.

46765 Die-cast, chrome-plated

46771 Replacement gaskets

Note: Not recommended for Buell models. OEM style "umbrella valves" are included to insure compatibility with crankcase and cylinder head venting.

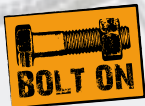

For Twin Cam Models from 99-13

LED

LED Smart Valve Cap by Ride-On

The led valve cap is a must for people that want to make sure that their tires are properly inflated. Once installed the valve cap will alert you if the tire pressure drops by 4 psi (with a +/- 10% accuracy). Great compliment to Ride-On TPS Tire Sealant and Balancer.

- Easy to Install - Simply screw valve caps onto tire valve stem
- Bright blinking LED light that is visible in daylight and night time
- Self-Calibrating - Automatically calibrates to pressure the tire was set at when the cap was installed
- Comes with integrated anti-theft device
- Blinking red light alerts of low pressure for 750 hours (more than a month)
- The led valve cap will blink yellow for up to 100 hours to alert you that the batteries are running low.

THUNDER MAX

EFI made simple.

ThunderMax ECM with Integrated Auto-Tune System

Get The Performance Your EFI Equipped Bike Deserves! Would you like to have full control of your EFI system, freedom to make major or minor adjustments without the need for a dyno or a degree in computer technology? Here is a simple solution - ThunderMax with Auto-Tune! The ThunderMax is an industry award winning product that replaces the factory module and is not an add-on box or signal modifier. The ThunderMax is purpose built to deliver uncompromising performance, but you don't have to be an experienced technician to install it, program it, or make adjustments.

Just how easy is it? Installation is a straightforward replacement of the factory module and oxygen sensors. The ThunderMax software contains hundreds of base maps that cover over 80% of popular factory and aftermarket combinations, each dyno-developed on real motorcycles. Choosing a basemap is a quick & easy process thanks to the software's sorting filters; loading a map takes less than a minute. After that you're ready to start the motorcycle, let the bike warm up at idle to operating temperature and you're ready to ride! During your ride, the ThunderMax Auto-Tune system analyzes the air/fuel ratio read by the wide-band oxygen sensors at warp speed after every cylinder fire and makes any necessary adjustments to the injector pulse width to achieve the desired air/fuel ratio while compensating for variations in injectors, fuel pressure, throttle body or exhaust flow. With every tank of fuel, at any temperature or elevation, your engine's tune is optimized by ThunderMax.

Simply put, ThunderMax is the most advanced, yet user friendly, performance engine management system you can buy for your Harley. Using the supplied ThunderMax software and communication cable allows you to adjust and monitor virtually every parameter in the system. Installation and How-To Videos are available on-line (You-Tube – ThunderMaxAV).

Power Tune Duals by S&S

Because of its style and power, the S&S Power Tune Duals header has been very popular with performance bagger enthusiasts. Now they're available with black heat shields, finished with the same Jet-Hot process as their black mufflers. Since the heat shields have 220° coverage, they create a black exhaust system. In fact, if you already own a set of chrome Power Tune Duals, we offer the black heat shields separately, so you can switch to commando mode with very little effort or expense. Same hidden crossover and pipe routing that takes the heat off your passenger. You still gain up to 8 hp over stock headers.

- Moves the rear cylinder header under the bike to reduce radiated heat to the passenger
- Full heat shielding with 220° coverage
- Oxygen sensor bungs*
- Durable 16 gauge construction
- Spherical inlet design for improved sealing and exhaust gasket durability
- Hardware included to mount crossover pipe
- Compatible with all slip-on mufflers

666403 Fits all 99-08 FLT models

666404 Fits all 09-13 FLT models

618042 Fits all 95-08 FLT models with black ceramic shields

618045 Fits all 09- FLT models with black ceramic shields

618043 Chrome shield kit for Power Tune Duals 95-08 Touring

618044 Jet Hot black shield kit for Power Tune Duals 95-08 Touring

618046 Chrome shield kit for Power Tune Duals 09-13 Touring

618047 Jet Hot black shield kit for Power Tune Duals 09-13 Touring

Note: Has both 12 mm and 18 mm oxygen sensor fittings in the stock locations. Caps are included for both sets of ports!

PRIMO BELT DRIVES

"DESIGNED TO FIT, ENGINEERED TO LAST"

667556

Primo Rivera 2" Touring Belt Drive

Primo's Brute IV Extreme Touring Open Belt Drive is just a measly 2" wide, but boy can it hold the power. The special 8mm Kevlar corded belt included with this kit was specifically designed to hold in excess of 150 HP. The drive's electric start feature utilizes a 66 tooth ring gear for maximum torsional longevity.

667539 Brute IV 2" belt drive for Touring models 90-06

667556 Brute IV 2" belt drive for Touring models 07-13

Joker

MACHINE

Joker's Viewtech VII Mirrors

VIEWTECH VII mirrors have that „OLD SCHOOL“ look found on the great classics of the past yet give you „state-of-the-art“ function of the 21st century! Fully adjustable 3 1/4" DIA. They feature cool retro style „holes“ along the stem for lightness. VIEWTECH mirror stems and heads are completely CNC machined from billet aluminum (not cast), light-weight, strong and fully adjustable in every direction to fit just about everyone. Swivel mirror head assembly is completely serviceable and is machined from a stainless-steel alloy ball that rides in a special polymer base to ensure super smooth action and corrosion free operation. Dimensions: 7 1/4 X 1 11/16 X 5. A direct bolt-on fit for late model Harley hand controls (including V-Rod) and most aftermarket hand controls.

- 684379** 6 Speed fluted housing for HD ONLY 07-13, chrome

Wagner Fuel Tank Sealing

Fuel tank sealing set is a special treatment to stop corrosion inside of fuel tanks and to protect the fuel tank from further corrosion on a longterm basis. The fuel tank sealing set consists of a rust exchanger and a single-component resin for longterm coating.

Rust Exchanger:

- Stops corrosion immediately, total derusting no longer necessary
- Additionally converts rust into a non-corrosive metal compound.
- The rust exchanger is a very thin liquid and thus gets through all pores.
- It forms a violet-black layer, an ideal condition for the following treatment with the sealing.
- It saves times and money, neither intensive derusting, nor dangerous sandblasting or undercoating necessary.
- It may only be applied on dry, oil and grease-free surfaces
- Easy application, ready for use, protect from frost.
- Content 250 ml sufficient for tank treatments up to 80 ltrs. tank volume (or multiple applications on smaller tanks).

Single-Component Sealing:

- Forms a fuel and acid-resistant longterm coating.
- Single-component resin, thus universal application.
- Multiple applications possible.
- Economic in use.
- Content 500ml, sufficient for tank treatments up to 80 ltrs. tank volume (multiple applications possible on smaller tanks)

685993 Wagner tank sealing kit

Vee Rubber Tires
